

● NOTICE ●

LOUISIANA PACIFIC OSB SHEATHING & SIDING – Be aware, the owner of a home may be eligible for compensation if they are experiencing or have experienced damage to the house or structure as a result of this sheathing and inner seal siding.

--IDENTIFICATION OF PROBLEM--

For homes manufactured between January 1, 1984 and October 22, 1997 only.

Sheathing is composed of thin wood flakes or wagers that are oriented in one direction and then impregnated with resins and bonded into structural wood panels under extreme pressure and heat. Different thickness may be used in roof, wall and floor sheathing. Claimant would be able to recover costs up to October 22, 2017.

Inner-Seal Siding manufactured before 1995 was susceptible to moisture damage. Eligible claimants would have incurred damage prior to January 1, 1996 and filed a claim prior to January 1, 2003.

If you feel you have identified this type of sheathing or inner-seal siding and it falls in the years of manufacture, we recommend you note same in the comment section of the report and make client aware of L-P OSB Sheathing & Siding Claim - Phone Number for L-P (800) 800-648-6893, L-P OSB Sheathing (800) 577-4836 or L-P Inner-Seal Siding (800) 245-2722. For class action information (800) 245-2722.

It is not your responsibility to qualify a claim, this is just a courtesy to your client as a professional manufactured housing appraiser.
