Recreation Vehicle Market Update

November-December, 2014

Industry Overview

Based on a year-over-year comparison of new unit sales, overall RV industry sales are expected to end the year up in 2014. Of the various RV segments, van motorhomes (class B) units continue to have the largest percentage of production.

Year-to-date, NADAguides.com consumer traffic is up 13%, with the most significant increase coming from research on standard-hitch travel trailers.

In early 2015, we expect to see continuing downward pressure on values, as the winter is forecasted to be colder and wetter than normal. Additionally, increased demand and production for new units will weaken the used market, as we move into the New Year.

NADAguides Data Overview

For the November 2014 update of NADAguides recreation vehicle data, various marketplace indicators and dealer survey input supported slight downward movement of used prices in most of the motorized and towable unit categories. However, Van Motorhomes are continue to show resistance to downward seasonal pressure.

Average Update-to-Update Change by Category

Towable Units

-2.1%

Motorized Units

-0.9%
