As many states begin to thaw, dealers are stocking their inventory for the buyers ready to get back on the road.

NADAguides’ analysts observed continued increases in value for cruisers, touring, road and trail, and dual sport bikes through the harsh winter. Utility vehicle values have held steady for several quarters and show no indications of decreasing as we move into spring.

A slight increase in off-road motorcycle values is being attributed to an earlier than typical release of new model year units; taking advantage of the excitement for the upcoming riding season.

Economic indicators point to increased consumer confidence and gains in the labor market. These factors, coupled with pent up demand, should drive buyers into the market and boost sales through the spring.
NADAguides Data Overview

For the March 2014 update of the NADAguides powersports data, various marketplace indicators and dealer survey input supported relatively flat valuations, with slight downward pressure on some used price segments.

A number of important economic factors affect the powersports market, including the unemployment rate, retail sales, the housing market, and the Consumer Price Index (a measure of inflation). These factors can be interpreted to represent the consumer’s ability and willingness to make a new or used motorcycle or ATV purchase.
